Priya Raman
Senior Software Engineer

SUMMARY
Backend engineer with 6 years building Java and Spring Boot services in fintech. Led the migration of a monolithic payment

EXPERIENCE
Senior Software Engineer, FinFlow Payments (2021-03 to present)
- Led the decomposition of the payments monolith into 9 Spring Boot microservices communicating over Apache Kafka.
- Designed idempotent payment-capture consumers with an outbox pattern, cutting duplicate charges to zero.
- Reduced p99 authorisation latency from 480 ms to 140 ms by tuning PostgreSQL indexes and HikariCP pools.
- On-call lead for the payments domain; ran 12 incident post-mortems.

Software Engineer, Ledgerly (2018-07 to 2021-02)
- Built REST APIs in Java 11 and Spring Boot for a double-entry ledger used by 200 merchants.
- Containerised services with Docker and deployed to Kubernetes using Helm.
- Wrote reconciliation jobs that matched bank settlement files against internal ledger entries.

PROJECTS
Kafka Replay Tool: Java, Spring Boot, Kafka Streams. CLI that replays dead-lettered events with schema validation.
Rate Limiter Service: Java, Redis. Token-bucket rate limiter shared by 30 internal services.

SKILLS
Java, Spring Boot, Apache Kafka, PostgreSQL, Docker, Kubernetes, Redis, REST, Microservices, JUnit, Git

EDUCATION
B.Tech Computer Science, National Institute of Technology Trichy, 2018

CERTIFICATIONS
AWS Certified Developer ? Associate
